Important Notes (Fix Pink Materials for URP and HDRP):

This package includes an **AutoSwitchMaterialShader** script that detects the active render pipeline (HDRP, URP, or Built-in) and automatically switches the materials to the appropriate **SpeedTree8 shader** without manual adjustments.

- **For URP (Image 1)**: Automatically switches to the Universal Render Pipeline ➤ Nature ➤ SpeedTree8 shader and enables **Two-Sided = Yes**.
- **For HDRP (Image 2)**: Automatically switches to the HDRP ➤ Nature ➤ SpeedTree8 shader and enables **Double-Sided = Checked**.
- **For Built-in Pipeline (Image 3)**: Automatically ensures **Two-Sided** rendering is enabled via the internal shader setting.

Once the package is imported, all **SpeedTree8 materials** in the **Materials** folder are correctly configured for the active render pipeline, no manual changes required.

Manual Fix: **Tools → Auto Fix Material (EG)**
